

Dear Friends and Colleagues,

It is with great enthusiasm that we invite share the Evanston REACH Task Force website with our community. Uinta County has been recognized by the state as excelling in many realms. Although we have enjoyed many successes within our individual programs, now is the time to join forces and see what we can do together. Prompted by the State Department of Health, the intent of this group is to provide an opportunity to collaborate with multiple agencies for the betterment of our community.

REACH stands for Resources, Education and Advocacy for Community Health. Although there are a number of critical, effective and worthy initiatives in the county, the primary goal of this task force is to bring diverse, yet cooperative agencies together to facilitate chemical, physical, mental and family health. This plan is comprehensive and all encompassing and will represent agencies county-wide. You have been identified as an integral component to this project and a key to our success -- you are an important piece of the puzzle.

In addition to collaboration, pertinent contact information regarding your organization is being requested to produce a resource brochure to disseminate county-wide. This publication will include a complete guide to all of the services and agencies available which make our community healthy.

Sincerely,

Tera Lawlar
